

# Postdoctoral position

## in synthetic main group chemistry

At the **Institute of Inorganic Chemistry, Czech Academy of Sciences (IIC CAS)** we are forming a new research team dedicated to synthetic main group chemistry. We search for new members to work on interdisciplinary project devoted to chemistry of **boron based Lewis acids**.

We offer

- **Full time contract** for a period of 2 years
- Competitive salary
- Support from Czech Academy of Sciences, the largest research institution in Czech Republic
- Subsidized accommodation near the place of work or in Prague
- Opportunity to join the research group at an early stage and participating on its growth

We require

- **Ph.D. degree in inorganic, organic or related fields of chemistry**
- Strong publication record proving experience in small molecule synthesis and its characterisation (NMR, MS, IR)
- Courage, self-motivation and proactive attitude
- Fluent English (knowledge of Czech language is not required)
  
- Experience in handling air-sensitive compounds (Schlenk techniques, glovebox...), high and low pressure gas manifolds and/or knowledge of computational chemistry is an advantage

Place of work: Řež near Prague, Czech Republic (ca 15 minutes by train from Prague)

**Expected start 1 July 2026** or as soon as possible
